Writing

Subject: popular leisure activities

Introduction

This survey ~~was~~ has been carried out by me for our school magazine in order to assess the changes of modern teenagers' popular leisure activities during the last 6 years.

Reading.

Reading books has become a lot more popular since 2010. This is illustrated by the fact that 6 years ago only 15% of teenagers surveyed read books whereas today 35% are interested in this activity. It is difficult to say what could cause such changes. In my opinion, that has happened as many teenagers have understood that books are more interesting than films.

Walking.

What about walking, its popularity has not changed a lot. The difference between the results of 2010 and 2016 is only about 2%. However, this increase shows that more and more teenagers are becoming aware of the importance of being a healthy person.

Computer games and cinemas.

The number of people who enjoy playing computer games and going to cinemas has really decreased. Each of these 2 activities has lost about 10% of its popularity. These changes have happened probably because teenagers have understood that these activities are not good for their health.

Future.

In my opinion, the tendency shown by this survey will stay at →

Handwritten blue scribbles and a large blue 'X' mark across the right side of the page.

WRITING

some point, however there will be some changes. Reading books will continue becoming more and more popular but not so fast whereas <sup>the popularity of</sup> walking will grow faster. What about playing computer games and going to cinemas, I think the number of people enjoying them will not decrease a lot. It may even increase a little bit.
