WRITING

Aim

The purpose of this report is to assess the results of a survey ~~conducted~~ on the subject of the types of classwork that students consider the most productive. The survey was carried out as an opinion ~~poll~~ on the school's website, and the amount of interviewees made up the majority of the students. The report will compare the findings to those gathered in 2010, analyze the reasons of the trends and speculate on any changes likely to happen in the ~~forseen future~~ future as well.

Overview

Since 2010, the choice of ~~the~~ most students hasn't changed: the number of interviewees ~~that~~ opting for ~~individual~~ working on their own has even increased ~~from~~ by roughly 10% since ~~at~~ its previous value of slightly more ~~of~~ than 40%. Besides, the amount of the popularity of team working in teams ~~that~~ including 10-20 students has risen from about 17% to 25%, having taken the second place in the new ranking. Conversely, there has been ~~a~~ a decrease in ~~the~~ the other options. The amount of students ~~prefer choosing~~ that prefer working in small groups of 3 or 4 people has slightly fallen, in ~~at~~ 6 years ago 1 out of 5 interviewees ~~preferred that~~ chose group working in small groups of 3 or 4 people, whereas ~~this~~ this number ~~has~~ is slightly less. As for working in pairs, ~~the~~ its popularity rate has ~~to~~ dropped sharply from ~~about~~ about 20% to 5% give or take 1%.

Explanations

The main factor ~~ma~~ key factor making individual work so ~~the~~ appealing might ~~be~~ be the proper concentration, which is ~~a~~ scarce while studying in groups. Furthermore, it ~~could be~~ is the 'distribution of knowledge' that could have caused the decrease ~~of~~ in popularity of working in groups or pairs. However, it is not true for team work, where the ~~the~~ process is usually adapted for students to perceive the information more easily. On the other hand, some people show better results while working together because of their ~~negative~~ mindset, that is why working ~~in groups of people~~ with others ~~will~~ accounts for about a half ~~of people~~ is still appropriate for about a half of the respondents.

Conclusion

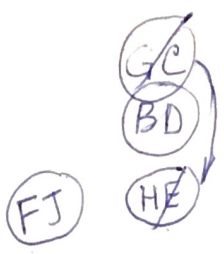

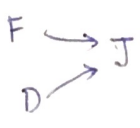

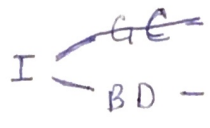

On the whole, the trends in the students' preferences concerning classwork clearly reflect the cognitive and psychological features of human's mind. It is highly likely that the ratio between individual work and the other types will stay 1:1, even with some fluctuations, while team work ~~will~~ and group work will level off ~~increase and slightly~~ gradually rise and level off and work in pairs will follow the decreasing trend ~~because of~~ owing to its ~~the~~ inefficiency.

**TASK 1. LISTENING COMPREHENSION (20 points: 1 answer = 2 points)**

For questions 1-10 complete the notes below filling in the gaps with ONE WORD AND/OR A NUMBER.

You will listen to the text ONCE. You have 1 minute to look through the task.

Peter Cheng  
Kings Rest

**Job Requirements**

- Type of work: answering the (1) phone phone
- Would need work (2) 12 hours permit
- Work in the (3) Hillstanne Road branch
- Nearest bus stop: next to (4) library
- Pay: (5) 4,45 pounds an hour
  
- Extra benefits:
  - A free dinner
  - Extra pay when you work on (6) nat. holiday weekends ???
  - Transport home when your work after (7) 11 p.m.
  
- Qualities required:
  - Clear (8) voice
  - Ability to (9) think quickly
  
- Person to contact: Samira (10) Manuja

Transfer your answers to the answer sheet

**TASK 2. USE OF ENGLISH (10 points: 1 answer = 1 point)**

Fill in the gaps with the words from the box. Each word is used only once. You may need to change the word in order for it to fit the context. There are 2 extra words in the box.

**Recyclable Gadgets**

cater for!!!

ASK - BUILD - CONSUME - CATER - FORTUNE - HOPE  
MAKE - LIVE - LONG - POINT - REPLY - RUIN

Every year, we buy zillions of digital cameras and cellphones — and then, a couple of years later, send them to the nearest trash bin. “New every two” isn’t just Verizon’s offer to sell you a new, discounted phone every 24 months; it also describes the average person’s 11. \_\_\_\_\_ habits for cameras, phones and other gadgets.  
consumptional / dunno

12. Unfortunately, no matter how well intentioned the consumer, it’s hard to fulfill that pledge to recycle, at least when it comes to electronic gadgetry. The phrase “sustainable electronics manufacturing” is almost an oxymoron, like “humble actor.”

That’s because the electronics industry itself 13. \_\_\_\_\_ upon frequent renewal. The iPhone, iPod or iPad you buy today will be obsolete within a year. Every pocket camera model on sale today will no 14. longer be sold six months from now. And Android phones — forget it. They seem to come out every Friday afternoon.

Does technology really advance that quickly? Or is planned obsolescence at work? It doesn’t matter. In the end, we’re as much to blame as the electronics companies. The manufacturers simply 15. \_\_\_\_\_ cater reply to some fundamental human drives. It’s style; it’s status; it’s the confidence of knowing that we not missing out on anything. Owning outdated technology 16. \_\_\_\_\_ makes us feel outdated ourselves.

Are there solutions? In hopes of harnessing much brighter brain power, recently I 17. (have) asked my 1.3 million followers on Twitter for suggestions.

56-55-98-52

(173.1)

The response was surprisingly 18. disappointing and voluminous. Unfortunately, most people weren't 19. \_\_\_\_\_ "It's not the gadgets — it's the people," wrote @calcrash.

A sizable number of people suggested that the industry should stop cranking out so many models. Several respondents 20. pointed out that a Rolex watch is so finely crafted that it's handed down through generations.

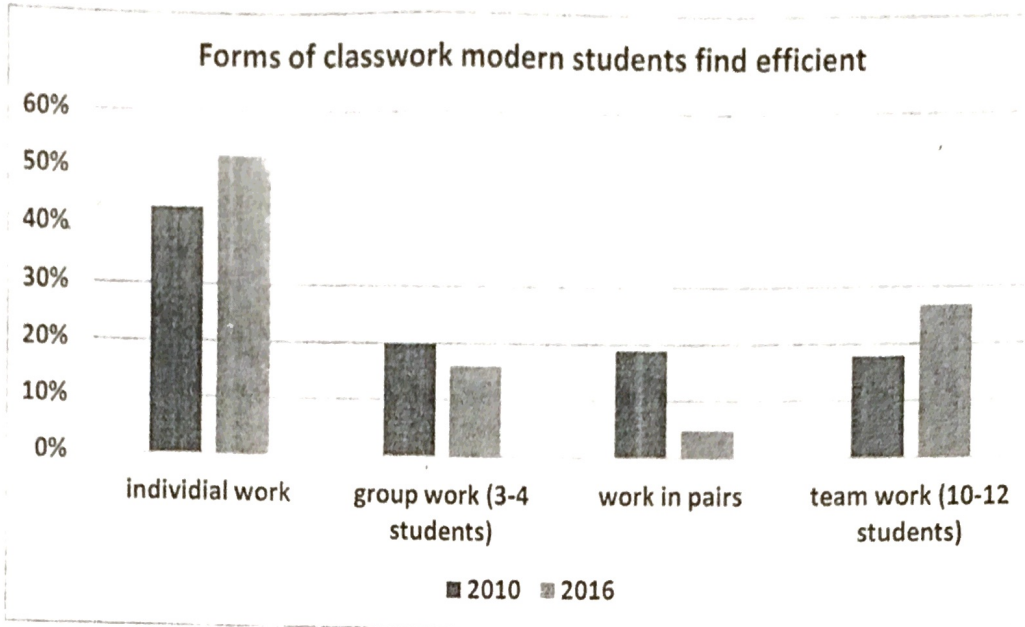

### TASK 3. READING (10 points: 1 answer = 1 point)

Put the following paragraphs in the correct order to recreate the text. Answer sheet 21-31.

#### Raising Bilingual Children

By ALAN JOHNSON

- A. All this is hot evidence for a mental exercise that could give children a lifelong advantage. Should you then sign your child up for whatever language you can find? Alas, no. Multiple languages are best for you when you've had them from birth.
- B. Johnson's own nipper is still pre-verbal at nearly 18 months, meaning that every request not immediately understood may quickly turn into a piercing shriek. But we take comfort that Johnson, junior, is cognitively just fine.
- ✓ C. But other studies find no vocabulary shortfall in either language. In short, there is little evidence that raising a child bilingual will hurt their primary language.
- D. If his language comes a little late, that is probably because, for one thing, he is male, and for another, he is surrounded every day by three languages: English and Danish at home, and German at nursery. More confusingly still, the three languages are closely related: is it *bread*, *Brot* or *brød*? The earthy words in English are mostly Germanic, meaning these triplets are coming up in his world all the time.
- E. This is probably because monitoring the use of two languages is itself an exercise in executive function. Such studies control for socio-economic status, and in fact the same beneficial effects have been shown in bilingual children of poor families. Finally, the effects appear to be lifelong: bilinguals have later onset of Alzheimer's disease, on average, than do monolinguals.

Aim

The purpose of this report is to assess the results of a survey on the subject of the types of classwork that students consider the most productive ~~and efficient~~. The survey was carried out as a poll an opinion poll on the school's website, and the amount of interviewees make up the majority of the students. The report will ~~analyze~~ the reasons of compare the ~~data gathered to that res findings~~ ~~reports~~ findings to those gathered in 2010, analyze the reasons of ~~any changes~~ ~~and speculate on any possible~~ the trends and speculate on any ~~possible~~ changes likely to happen in the foreseen future as well

Overview

Since 2010, the ~~to~~
