Task 1. T51-10

1. was
2. had to
3. would stand
4. is ~~be~~ bound to make.
5. has reshaped
6. While
7. used to know
8. wasn't
9. far ~~max~~ more
10. could benefit

Task 2.

11. ~~B~~ B
12. D
13. E
14. A
15. F
16. C
17. J
18. ~~K~~
19. G
20. H

Task 3.

21. ~~C~~
22. B
23. C
24. A
25. A
26. C
27. B
28. C
29. B
30. C

Task 4.

The four-day workweek, a controversial concept, has gained considerable popularity in the last decade. Many companies around the world have been adopting this system. However, the views on this week structure ~~very~~ vary. In this essay I will analyse the key points from the two texts and express my opinion.

While the texts explore the same problem, they have their differences. Text 1 mainly focuses on the benefits the four-day work week presents. It is mentioned that this model can maximise efficiency whilst ^e keep the employees' well-being in the good condition. In contrast, text 2 for the most part explores the challenges the shortened ^{workweek} workweek promises. It focuses on the rising levels of stress of the workers, round-the-clock service problems, etc.

~~Both texts~~ In both texts it is acknowledged that with a careful approach and assessment of their work model companies can successfully ~~ex~~ implement the four-day ~~workweek~~ workweek. I too believe that rethinking the way businesses operate is an essential part of making sure the new system is beneficial to the employees and the ^{organisation} company as a whole. Truly, this model has the potential to maximise productivity while keeping the workforce loyal.

In conclusion, the four-day ~~workweek~~ workweek is a controversial

Умомовик 2.

idea^a, yet also a promising one. The implementation of this model is a daunting task. However, if the workflow is properly restructured, ~~that~~ both the employers and the employees will bare the fruit of this change.

vr 5.

Hello again, my dear followers, I haven't written any blog posts in a long time, because I have been trying to avoid social media. That didn't work out, as you can see, so in this I am going to explore how my daily life would change if the platforms on the Internet that we use to connect and share information ~~was~~ suddenly disappeared. You will be surprised, so ~~read~~ read until the end.

Productivity.

I didn't know whether I should even mention this, since it's among the most obvious ^{consequences} that would take place if social media ~~it~~ ceased to exist. Seriously, do you even realise how much time the average person wastes scrolling Instagram or Facebook? An unbelievable amount. I ~~the~~ think the sudden boost in productivity would be the first thing I notice after my brain frees itself from the piles of garbage it collects online.

Peace of mind.

Social media has become my main source of news, and ~~freedom~~ all this exposure has probably robbed me of 5 years of my life ~~in~~ ~~my~~ ~~mind~~. Sometimes being oblivious is better.

Relationships and hobbies.

I know that ~~as~~ many of you have friends that you ~~only~~ only communicate with online. ~~That~~ Thankfully, that is not the case for me, so all my relationships would be unharmed if social media disappeared. However, how can I forget about you, my dear followers? Making content for you and reading your comments would be impossible without Internet platforms. Not being able to communicate with you would certainly make my life more challenging.

So, what do you ~~3~~ think? Let me now in the comments below. Personally, I think the consequences would be both helpful and harmful. Well, that's all from ~~me~~ me. I will see you around.
