Task 4.

Nowadays, implementing a four-day workweek is growing more and more popular across the globe.¹¹ Many companies are trying to reduce working hours, while keeping the same salaries.²⁷ However, this system has both advantages and disadvantages, which need to be taken into consideration.¹²

To begin with, a shorter workweek can boost productivity and efficiency ^{among} of the employees. Moreover,⁵⁸ it benefits both their mental ~~health~~ and physical health by ~~giving~~ providing more free time ^{for} for various needs, which is crucial in maintaining the workflow.⁸¹

Nevertheless, reduced working hours may lead to experiencing pressure to do the same amount of work in less time, which results in increased stress.¹⁰⁷ Also, many businesses are afraid that a condensed schedule may harm ~~the~~ multiple industries and job aspects.¹²³ For example,

healthcare and customer support workers ~~need~~ ^{have} to be available constantly, which may be problematic while only working ~~four~~ days per week. Despite these concerns, I am certainly convinced that ¹⁵⁵ a reduced workweek allows many companies to build stronger and ~~no~~ more loyal ~~relation~~ relationships with their employees. ¹⁷² It is widely known that when people are able to ~~sustain~~ improve work-life balance, they usually feel more motivation and eagerness to work productively, which benefits the society. ²⁰¹

To conclude, I would like to mention that the four-day workweek is undoubtedly ²¹¹ a revolutionary concept. It ~~needs~~ to be studied ~~to~~ ²²⁰⁷ to outline its impact on the society.

Task 5.Cleaner lives

What would happen if social media platforms suddenly ~~would~~ disappeared? How would our daily life change? ~~Will~~ we return ~~to~~ the stone age or become a better society? These questions tickle the minds of many people, and now I want to share ~~my~~ ⁴⁵ thoughts on this topic.

work-life balance
At first I would argue that ~~the~~ the absence of social 'media' ~~can~~ can become a catastrophe. What I mean is, no one will die or suffer physically. Certainly, I think life may ~~become~~ grow increasingly challenging due to the loss of instant communications. Of course, it would harm sharing information, leading to pure chaos among the white collars. Workflow of many companies may deteriorate ¹⁰⁷ causing unemployment and stress. However, we ~~can~~ can return to using old-school technology ^{ies} like

the fax machine ¹²⁰⁹ eventually, the negative impact may ^{disappear} disappear, which leads to ~~the~~ my next point. ¹⁴¹

Essential things

Secondly, if social media platforms disappeared we would prioritise our relationships more. Would you agree if I told you that nowadays we spend little to no time with our ~~real~~ friends and families? ¹⁷⁷ With the loss of annoying distractions our relationships may strengthen, causing the increase in hours spent with our loved ones. Adapting to our new lifestyle, we may find satisfaction in things which were ~~unfortunately~~ dismissed as unnecessary ones in the past. ²¹⁸

Final thoughts

Overall, ~~this topic is~~ I guess this topic is highly controversial. What do you think on that? Let me know your ideas or links in the comments below! ²⁴⁵ Next week I will write another blog post, covering your points of view. ²⁶⁰
