Task 4.

The concept of working four days per week ~~is been~~ is becoming more and more popular nowadays. Nevertheless, there are still people who tend to dislike this idea. Four-day workweek has both advantages and disadvantages, which are discussed in the given texts.

As we can see, the first text mostly highlights the benefits of the four-day workweek. It lists such positive sides of it as workers becoming more loyal to the company, decreasing stress level, improvement of work-life balance and so on.

Усумовак 2

All of these stated points show that working four days per week is a really beneficial ~~is~~ concept. Naturally, there are some drawbacks, such as difficulties with staying productive. Fortunately, experts state that the right planning would definitely prevent companies from the lack of productivity. The second text represents a more negative viewpoint, stating that the shortened ~~work~~ workweek causes stress and makes it harder to maintain good client relationship management. On the other hand, we get to know that this concept might increase morale and efficiency. I personally have a neutral opinion on this issue. I think ~~that~~ that there are both advantages and disadvantages and they do not overweight each other, in case if the idea is implemented correctly.

Thus, the concept of a four-day workweek is an extremely controversial one. Of course, it should not be used in industries requiring non-stop working service, such as healthcare, but ~~the~~ it is probably worthy of trying in other businesses.

Task 5.

If Social Media Didn't Exist

Posted by Lila, 26.10.2024, 16:13.

Hi, everyone! I'm glad this publication caught your attention. I'm pretty sure all of us has every everyone has thought about this question at least once, so I'd like to share my thoughts. What it'd be like if social media didn't exist?

Radical Changes.

First of all, if social media didn't exist you wouldn't be able to read this post. All of us are used to social media, aren't we? Thus, our daily life would've changed severely if social media ~~disappeared~~ had disappeared: we wouldn't be able to scroll through TikTok before bed, ~~we~~ ~~wouldn't~~ wouldn't care about the amount of likes on our Instagram accounts, and, of course, ~~we~~ wouldn't spend hours thinking of what to ~~eat~~ watch on YouTube while eating. It might not look like

 great changes but, believe me, you'd be struggling
 Our communication would definitely change too,
 as we wouldn't be able to send uncountable
 video or voice messages and funny memes.
 Moreover, we would probably had to call each
 other instead of texting, so I feel bad for
 introverts. If you have any online friends,
 you would definitely have to say bye to them
 and go outside to know what actual
 socialization is, as relationship between people
 would ~~definitely~~ obviously become different too.

Offline ~~Chatting~~ Challenge.

Honestly, I feel like our lives would become
 better without social media platforms. We would
 naturally feel some kind of withdrawal at
 the beginning, but would get ~~used~~ accustomed
 to the absence of these platforms. Life would
 become harder in many ways, of course. We'd
 have to actually meet each other instead of
 using video calls, but is it bad? We'd have
 difficulties with sharing information and
 staying connected, but there's nothing better
 than the communication in real life.

And what do you guys think? Leave
 your comments below and tell us your
 opinion! Once we'll get ~~1000~~ ^{this} ~~likes~~ I'll try ~~it~~
~~to~~ and spend the ~~whole~~ week without ~~to~~
 social media. Like this publication and wait
 for the update!
