Задача 4

On a nice day in the countryside, everything felt calm. It was early morning and the sun was shining in the sky. It felt like nothing could spoil the moment.

Suddenly, a loud noise surprised everyone. People started coming out of their houses and trying to figure out what was happening. An ancient windmill was making strange noises and it took half an hour for people to realise something wasn't ok with it.

The old farmer decided to check it. As he got closer, the sounds became louder and louder. They were similar to the sound of an old door opening. The farmer suddenly shouted: "Run away! Quickly!" And everyone got away as he asked.

Right at this moment, the windmill stopped and suddenly collapsed with a rumble. Everyone was shocked, especially the farmer, who realised it could collapse just the second before this actually happened. Luckily nobody was injured, but the pieces of the windmill had to be cleared removed.

It took the villagers for about half a year to build a new one, but many of them are afraid of the windmill as they think it may collapse, too. By the way, the farmer is now considered the village's hero due to saving people by telling them to avoid the windmill. Everyone has a different opinion about this story and its outcome, but if you ask me, I'd say that I'd never thought something so interesting would happen to me.
