Task 6: Transportation has evolved over the years. Cars are the most popular mode of transportation. However, because of them the level of air pollution has risen. Are you tired of breathing this dirty oxygen? Do you want more fresh air around you? Do you enjoy riding over-priced taxis for short trips? Well, I have a solution for you! I bring to you "Velo-cab" - a service where your taxi ~~is~~ is not a car, but a bicycle!

Not only will my service allow for teenagers to work, but it will also allow others to save money. Taxi prices are ridiculously enormous and are ~~usually~~ usually not worth their money. Bicycles do not require that much money and care, so overall costs for a trip will be lower. "Velo-cab" is also a more eco-friendly way of transportation, as it doesn't require any petrol. To add, teenagers who don't have a ~~driving~~ license can earn extra money by ~~dropping off~~ dropping off others in their area. For my service to work, you just have to add some extra seats to the bicycle. To add, teenagers who don't have a license can earn extra money by dropping off others in their area. So, that way "Velo-cab" kills several birds with one stone. To start, my company will work locally in more rural areas. These places usually have the most problems with getting somewhere, so I believe that my business will help fix

this challenge. Though I do hope to expand my company globally in the future. To promote my business, I would like to collaborate with eco-activists and eco-friendly brands. I hope that with their help we can get the word out about a mode of transportation that doesn't harm our environment.

So, I would like for everyone to have no difficulties with transportation. I hope to save our planet and together I believe that it's possible! Let's "save money, save the environment and ~~save~~ save ~~lives~~ lives!"
