'Upside down' online school

~~Subject: an application for the national "Young Innovators" grant competition~~

Introduction

The aim of this proposal is to reveal and advertise the brand-new online school which is called 'Upside down'. By giving thorough description of its consistency, services that are going to be provided, further goals and plans there is going to be a presentation provided. The proper show-time presentation will be provided.

Services

First of all, we decided to set up an online school

because we were unsatisfied by others. Their attachment to the old-fashioned books and methods crumbled the whole concept of their products, making it impossible for children to get the best out of their studies ~~really~~. By carefully examining their failed ~~experiences~~ ^{attempts} ~~we~~ at teaching, we came up with our contemporary scheme that was mainly built on multi-tasking and AI technologies. 'Upside down' provides clients with unique academic approaches. It allows children to glide through the depths of complicated information by ~~simply~~ ^{by} talking to AI bots.

Simply, 'Upside down' offers children some ^{academic} ~~special~~ courses with digital AI-supervisors. Target customers of our online schools are, of course, students of all the ages and their parents. ^{effective}

Goals and Problems Solved ^{students}

As was mentioned before, 'Upside Down' is a response to upcoming changes. Time flows by, people come up with captivating ideas such as creating digital assistants and bots. 'Upside down' ^{has} adapted this system and made it its speciality. It is crucially important to follow the digital tide in order to make the best out of our studying experience. After all, ~~it was~~ online schools were always about omnipresence, effectiveness and productivity.

Scale to it

'Upside down' will ^{only} function online, that's why ~~the~~ ^{access} will be provided to everyone needed. It will work globally as it is always better to tick ^{all} the boxes on ^{the} world's stage: advertisement will be provided all by itself as rumours are going to be spread.

Advertising

'Upside down' has already been discussed by several big companies online, ~~because it is unique~~. Firsthand advertisement was provided by that. However, our online school will be advertised by special SMM-managers that are going to make Tiktok videos about it and publish ~~ads~~ on social medias.

Conclusion

'Upside down' is not a simple school, it is a whole new way of thinking. Our slogan ~~Make the whole world turn upside down by your thinking~~: Turn your brains upside down. Suggests you to change your mentalities for good and join our

Life journey of studying efficiently!
