Better Plastics Introduction

Land and water pollution is one of the world's biggest problems. It can eradicate entire ecosystems, contribute to climate change and, in some cases, even affect the air we breathe ~~and~~ and the water we drink. Its main driver? Plastic. It is not that commonly recycled and takes thousands of years to decompose. But it does ~~not~~ ^{not} have to be this way.

New ~~the~~ versatile plastic-like materials have already been invented. However, barely any are being used. We are aiming to fix that. By applying our expertise in business and marketing, we are going to sell those materials to a range of industries. The world needs a more sustainable material to replace conventional plastic. With our business, we ~~will~~ ^{will} be helping different companies make the switch easily, ~~thereby~~ reducing the load on ~~the~~ the planet. Improving the planet is one of our main goals at the company. We are hoping to start providing our services at a local level first to streamline the process, and then move on to a global level. We will advertise our product both online and on billboards in different cities. We understand that some ~~businesses~~ ^{brands} may be reluctant to adopt our product, which is why we will campaign for people to ~~we~~ switch to brands that are already using it. ~~We~~ We will do this by explaining how ~~our~~ ~~the~~ biodegradable materials like ours help save the Earth from pollution.

This is our vision for our startup. Our mission ~~is~~ here at Better Plastics is to help inventors of new materials bring them to the public and massively help ~~to~~ our planet in the process. Our slogan - "Better ~~Plastics~~ Plastics - better world" - is a representation of our mission.
