Task 6

### The Financial AI-dvisor

Have you ever wondered ~~why~~ <sup>how</sup> the likes of Elon Musk and Jeff Bezos got so ridiculously rich? ~~There~~ <sup>One</sup> of the most instrumental reasons for that might have just been that they had brilliant, sagacious, all-knowing advisors that ~~helped~~ assisted them on their way to success. But what if you, striving to make the best out of your own money, don't have one? Well, then our company has a solution just for you!

For an affordable ~~subscription~~ <sup>price</sup> of only ten dollars a month, we would provide our customers with a cutting-edge technology app that, with the help from artificial intelligence, will analyze the market for you, providing top-tier advice, or calculate your taxes, or even find the places with the best value-for-money products that you desire. Aside from its versatility, the best thing about this app is how accessible it is. You can chat with ~~the~~ AI just like you would with a real human, and - no matter your age or occupation - it will certainly help you out.

It is unopaque that our app will raise the financial awareness of our population. Not only it will help each individual make smarter financial ~~choices~~ decisions, but also stabilize the global economic landscape by reducing the amount of uncalculated decisions people make. Thus, ~~the app's goal is to~~ we should aim for making the scale of our app global to maximize our positive influence on the world as a whole. To achieve this scale, the company will advertise through the most popular influencers by getting them to film short videos ~~about~~ of using the app, highlighting its benefits. That way we will reach the widest audience possible, all while gaining their trust.

To extrapolate, I want to highlight that this project is truly one-of-a-kind and deserves the biggest attention. It is absolutely worth investing in this startup if you want to make our world a better place. Use AI so your stocks fly!
