Task 6.

SEE IT ONCE

An ~~A nation~~ In this article, we would like to present a business proposal for a national "Young Innovators" grant competition. We are a team of five high school students from Highland School, and here is our idea.

We will sell 3D printers with a built-in technology of visualizing and then printing any scene from a book. Our target customers are universities and schools looking to improve their students' performance by changing usual teaching methods, filmmakers trying out computer graphics and just people passionate about literature.

Our business responds to problems faced by students who naturally perceive visual information better than ^{for instance} a traditional lecture. It's significant because it would help create equal opportunities for everyone who wants to learn.

At first, our company will start to work locally, creating objects for our high school. However, we will be able to ship a printer across the country, so with we will work nationally as well.

A first round of advertising would be guaranteed by showcasing 3D objects at our school to university representatives who often visit it. After that, we plan to place advertisements in magazines, specifically aimed at professors.

~~Finally, we hope that our project deserves recognition and wins the competition. After all, we have a perfect slogan: "See it once, know it forever!"~~

Finally, we are proud to present our project to such a broad and competent audience. We are just as proud to announce

that, after working on the technology for the printers for ~~one~~ two years, we will be ready to send it to the judges next week. We hope that our proposal will prove to be useful and deserving of recognition. After all, we have everything ready, even a perfect slogan:
"See it once, know it forever!"
