## Startup Proposal

## The Premise

This proposal aims to present a startup concept with conclusive ~~st~~ research and innovative approach at its ~~core~~ <sup>in its</sup> foundation. ~~The company we propose aims to fulfill is a fresh outlook on the stagnant market of sports drinks, tonics, an tonics and supplements.~~

~~The gist~~ Gist

~~The company we are planning to establish will fulfill long term.~~ Our company aims to dominate the custom-made machinery parts market using 3D-printers as the main driving force.

## The Gist

The company we are planning to establish will fulfill a niche, yet crucial need in unique metal and polymer parts. For the longest time innovations, and even engineers and even architects in their strive for never-before-seen concepts had to order experimental components from specialised manufacturers - a costly and time-consuming process.

A fine-tuned array of 3D-printers, which we plan to employ, would solve these issues, thus allowing inventors from all ~~corners~~ <sup>bring</sup> corners of the globe an easy way to ~~turn~~ <sup>bring</sup> their ideas into reality. Solving this bottleneck would ~~not~~ <sup>not</sup> only place our company at the top of the list, but also solve a major problem of inventors falling short when it comes to presenting their prototypes to the investors. It is in our best interest to work internationally as we aim to ~~provide our customers with~~ <sup>reach</sup> to broaden our ~~customer~~ base as far as possible and ~~even~~

~~Чисто бик~~ Чисто бик

gather trust and reputation with the biggest actors in the field. Employing innovative advertisement schemes, such as social media ads, would allow us to form an ~~starting~~ initial customer base post haste.

The Summary

We hope that this conclusive proposal found you interested in the opportunity presented. ~~We~~ ~~to~~ We strongly believe that this one-of-a-kind business startup has all the reasons to become the next big hit in the engineering sphere. Our slogan "Cutting ~~the~~ edge precision across all dimensions" exemplifies our principles of delivering a high quality product, and this proposal, which shall become ~~the~~ a stepping stone in our success, shares them.
