An Unexpected Space Object

On a nice day in the countryside, everything felt calm. It was the middle of the spring, so the weather was warm and amazing. The sky was clear and the sun was shining brightly, the birds were singing and the flowers were growing. I was playing football with my friends on the field beside the house, where I lived. I scored two goals and ~~I~~ was pleased with that. Then, when I was struggling to score another goal, I looked at the sky and saw something orange and bright.

Suddenly, a loud noise surprised everyone. It was like an explosion, but not so strong. We stopped our game immediately and rushed to our parents to tell them about the noise. They also heard it, so we started to think what that was. For a few minutes we were suggesting different ideas from a thunder to a bomb, but suddenly I suggested that it was a meteorite, because I had seen something orange and bright in the sky before. We understood that it was a great and logical idea and we walked to the place, from which the noise was came. It was in the forest, so there were many fallen trees, because my suggestion was true - it was a meteorite! When it was falling on the ground, the trees fell under its massive body!

I'd never thought something so interesting would happen to me. I had never seen meteorites before, so this occasion is unforgettable for me.

K1 - 15
